Cappuccino.Encoder.name can be accessed from Apps.OpenCv, where it is used to store the appname. Does anyone know if this is the right place for me to be trying to access this. Thanks. Reply Oct 11, 2017. I have an OpenCV which i built using Visual Studio 2017 32-bit. I am using opencv 2.4.10, and Visual Studio 2017, but when i compile it i get the error. This is a new project, i have built it with VStudio before and it worked fine. Reply I used this tutorial in order to test out OpenCV in a visual studio project. We are developing a game engine for our platform. It was quick and easy. I. Was able to get the first tile to load without a problem, but my app crashes when the app goes to the run mode. I would like to use the software called "OpenCV for Visual Studio" in order to use the functions and methods that they provide. ReplyOxidative stress markers in transgenic mice overexpressing human endothelial NO synthase. Aortic endothelial cells (ECs) of transgenic (Tg) mice overexpressing human endothelial NO synthase (ecNOS) are protected against atherosclerosis. We aimed to determine whether ECs of Tg mice show modifications in their antioxidant status. We evaluated EC from aorta (AA) and mesenteric (ME) arteries from adult Tg mice and their corresponding controls. As markers of oxidative stress, we measured ECs superoxide production, and plasma levels of antioxidant markers such as reduced glutathione, reduced glutathione/oxidized glutathione ratio, nonprotein sulfhydryl groups, carboxyethylpyrrole, and total antioxidant capacity. In aortic ECs, superoxide production was lower in Tg mice than in controls (0.1 +/- 0.03 vs. 0.15 +/- 0.04 nmol DCF/mg of protein/30 min, p
